Case Study 14: Healthy Food and Nutrition Website

Introduction and Purpose

The Healthy Food and Nutrition Website shares simple recipe ideas and basic nutrition details to encourage healthy eating. The page displays food choices in separate cards, making the information easy to read and compare.

Main Features

- Shows healthy recipes such as Vegetable Salad, Fruit Bowl and Oats.
- Lists the main ingredients for each recipe.
- Displays approximate calorie information for each food item.
- Includes a healthy-tip button to draw attention to useful eating advice.
- Uses a light green background and clear cards to create a fresh, simple design.

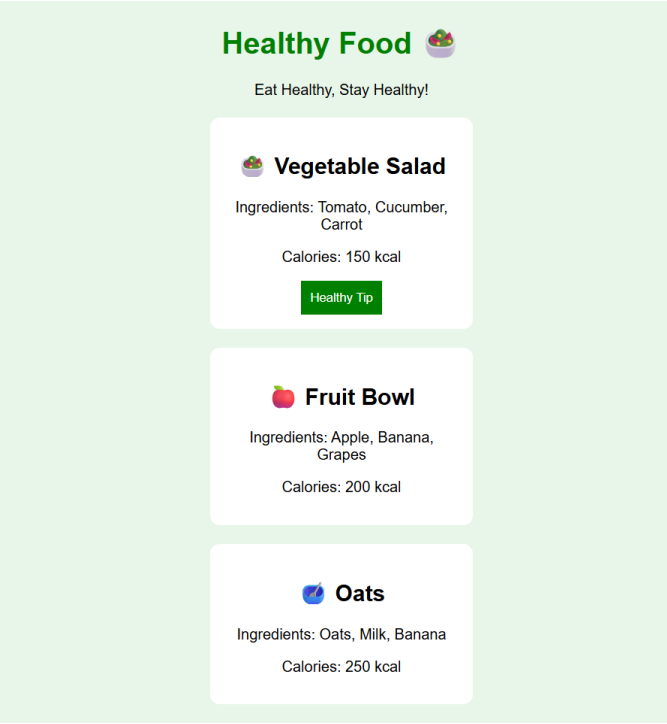

Target Users

Students, families and people who want quick ideas for nutritious meals.

Benefits and Notes

It helps visitors find recipe ideas and understand ingredients and approximate calories at a glance. Calorie values are examples and can vary with serving size and preparation.

Case Study 26: College Fest Management Website

Introduction and Purpose

The College Fest Management Website provides students with the key information needed to attend a campus event. The sample page is titled “NRI TechFest 2026” and focuses on Artificial Intelligence.

Main Features

- Displays the fest name and theme.
- Introduces speakers and their roles.
- Shows a simple schedule with speech and workshop timings.
- Provides the venue information: College Auditorium.
- Includes a registration area where a student can enter their name.

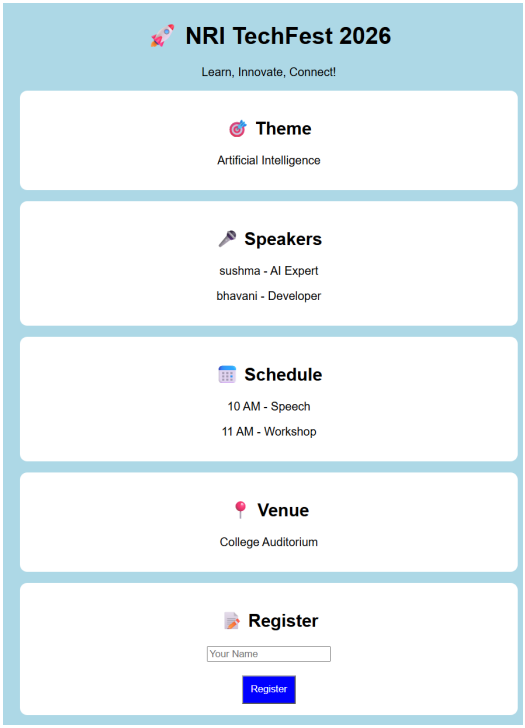

Target Users

College students, event organizers, faculty coordinators and invited speakers.

Benefits and Notes

It brings event details into one page, helping students understand what is happening, when activities take place and where the fest is held.

Case Study 9: Bakery and Cake Shop Website

Introduction and Purpose

The Bakery and Cake Shop Website presents bakery products and basic ordering information in a visually attractive layout. The sample page is titled “Sweet Bakery” and highlights cakes, pastries and cookies.

Main Features

- Displays product names such as Chocolate Cake, Fresh Pastries, Cookies and Custom Cakes.
- Shows example prices for products and a starting price for custom cakes.
- Highlights a special offer for selected cakes.
- Provides contact details and an “Order Now” call-to-action.
- Uses bakery-themed imagery and warm colours to create a dessert-focused design.

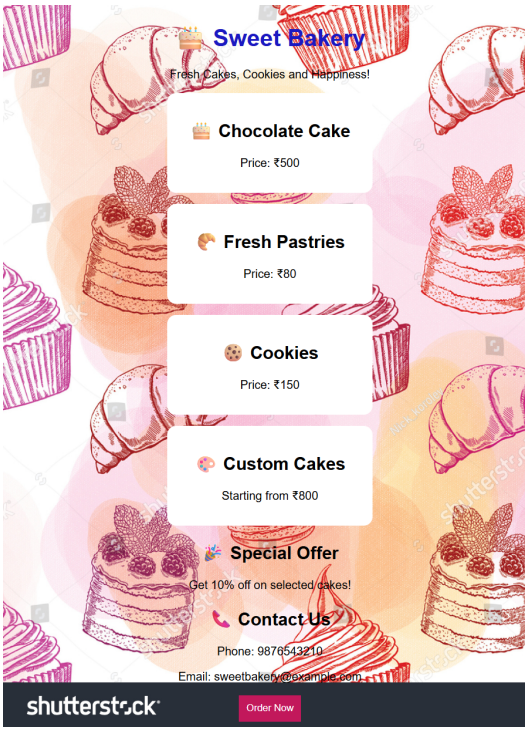

Target Users

Customers looking for celebration cakes, pastries, cookies and custom bakery orders.

Benefits and Notes

It helps customers browse products and prices, notice offers and find contact information. The phone number and email shown in the sample should be replaced with verified bakery details before publishing.
